- SONAR refers to the device used to detect what is underwater
- On the surface, we observe various **behaviours** e.g. stress, lack of motivation etc, but we do not know the causes
- With the 29 **SONAR questions**, we can explore the underlying risks and evaluate if they influence positively / negatively the behaviours and hence the well-being of our staff members

# Conclusions – Action plans & Timeline

# What should we learn from the results of this survey?

- Satisfaction & NPS score less well than 2018
- Motivation of people is still good (cfr 2018) and intention to leave is low
- Questioning concerning neutral assessment of risk factors
- Vanhout has some strong points to increase the well-being of their employees & workers -> Support from colleagues and superior (Culture) but must improve the global atmosphere
- Less good scores are globally linked with the atmosphere & global well being of manager
  - ▶ *Action should be decided on those priorities*
- Significant difference in perception between managers and non-managers = labour organisation
- We need to be careful with the unwanted behaviours (internal & external) towards managers
